○ akasuju

Objectives

Detail-oriented individual seeking a QA internship or entry-level role to apply foundational knowledge of manual testing, automation basics, and testing processes.

WORK EXPERIENCE

Cognix Insights

Quality Assurance (QA)- Intern   Sept 2025 - Dec 2025

- Designed and executed test cases for web and mobile applications including Naasa Securities Broker KYC, CI-KIEC, and KYC Admin Panel.
- Identified, documented, and retested bugs and performed functional, regression, and end-to-end testing.
- Tested REST APIs using Postman and swagger to validate backend and KYC verification workflows.
- Automation practice for critical KYC flows and test cases using Playwright with TypeScript, following automation best practices.
- Conducted basic performance testing using JMeter/BlazeMeter.
- Worked in an Agile/Scrum environment, managing test cases and defects via Azure Boards and GitHub.
- Git/Github practice for version control and code management.

Binary Digits

Junior Quality Assurance   Feb 2026 - Present

- Tested quiz gaming platform including quiz creation, hosting, join codes, and scoring logic.
- Validated authentication, email verification, and password rules.
- Executed smoke, regression, functional, and UI testing across user and admin modules.
- Tested medical record uploads, notifications, and appointment booking with conflict validation.
- Reported UI, performance, and API issues to improve system quality.

EDUCATION

Glacier International College

Science - 3.4   2019 - 2021
New Summit College

Bachelor of Computer Application   2021

PROJECTS

Naasa Securities-KYC
- Wrote and executed manual test cases covering different module in KYC of both mobile and web based KYC.
- Wrote playwright script covering important test cases.
- Bug Reporting followed with re-testing and Regression testing.
- Used postman, swagger for validating API responses.
- Used ADB platform tools during testing to monitor logs and verify app behavior.

Connect Infinity-KIEC

CI-KIEC is a CRM for KIEC consultancy designed to manage students and keep their profile.
- Executed manual test cases for student registration and profile modules.
- Identified and reported UI and functional bugs.
- Performed basic API testing using Postman to verify responses.

PlayWright automation Practice 🔗
- Automated KYC web flows using Playwright with TypeScript.
- Applied Page Object Model (POM) and fixtures for maintainable test structure.
- Implemented global authentication using session storage.
- Used locator tools like Locators lab and selector hub.
- Used Trace Viewer for debugging and test analysis.
- Handled UI elements such as inputs, dropdowns, file uploads, and assertions.
- Maintained automation code using GitHub.

SKILLS

- Testing & QA: Manual Testing, Test Case Creation, Bug Reporting, Playwright, Postman& Swagger, JMeter, Documentation
- Development & Scripting: JavaScript &TypeScript
- Tools & Methodologies: Azure Boards, Git, Agile/Scrum, Excel
